### PROJECTS

#### Food Delivery App

---

[Live Demo](#) | [GitHub Repository](#)

A Food Delivery App built using React

- Online **food ordering** is a process of **ordering food** from a local **restaurant** or **food** cooperative through a web page or **app**. Much like **ordering** consumer goods.
- Developing a **food delivery app** is a great idea because it allows businesses to tap into the growing online **food ordering** and **delivery** market.
- With the option to order their **meals** from a mobile **app**, they can easily place an order when they are stuck in traffic or on the way to pick up.

#### Blog App

[Live Demo](#) | [GitHub Repository](#)

A Blog App built using React

- **provide content on your website that answers your prospective customers' questions and helps them learn about your product or service..**
- Publish your passions your way. Whether you'd like to share your knowledge, experiences or the latest news, create a unique and beautiful **blog**.
- The best way to learn something is by doing. So, let's build a simple **Blog app** using React to understand how things work.

#### E-Commerce

[Live Demo](#) | [GitHub Repository](#)

A E-commerce app built using React

- E-commerce is a method of buying and selling goods and services online.
- You can use e-commerce channels such as your own website, an established selling website like Amazon, or social media to drive online sales.
- **E-commerce** (electronic commerce) is the activity of electronically buying or selling of products on online services or over the Internet.
